

4WRDTECH

Investment Thesis

web3 themes & peripheral value-adding products

CROSS-CHAIN INTEROPERABILITY

Develop frictionless transfer of assets across multiple blockchain.

MIDDLEWARE LAYER

Facilitate implementation of portable applications by developers.

SCALABILITY SOLUTIONS

Mitigate computing demand for primary Layer 1s like Ethereum & Bitcoin.

SECURE STORAGE

Blockchain-linked distributed, persistent & high-security systems for off-chain data.

PRIVACY PROTECTION

Integration of off-chain computing with on-chain smart contracts & preservation of private data via protocols such as ZK proofs.

DIGITAL TRANSFORMATION

Convergence of physical / digital identities & environments using spatial computing — dynamic 3D model visualisation frameworks in real-time.

AI FOR METAVERSE

3D architectural models (as extensions to Unity, UE etc.) enabling game designers to construct full environments from text, speech or reference content — to optimise design cost & timelines.
