

# 4WRD TECH

## Investment Thesis

web3 themes & adjacent value-adding products

### CROSS-CHAIN INTEROPERABILITY

Effectuate frictionless transfer of assets across various blockchains.

### MIDDLEWARE LAYER / INTERFACE

Abstraction interface for effective development and facilitation of portable applications.

### SCALABILITY INFRASTRUCTURE

Increase transaction throughput, reduce fees and improve overall customer experience and value.

### SECURE STORAGE SOLUTIONS

Blockchain-linked, distributed, persistent & high-security systems for storage to bring privacy and security to data.

### PRIVACY & SECURITY APPS

Application built for fast & efficient proof verification and support privacy-preserving transactions using protocols like ZK proofs.

### DIGITAL TRANSFORMATION

Convergence of physical / digital identities & environments using spatial computing — dynamic 3D model visualisation frameworks in real-time.

### AGI FOR SPATIAL WEB

3D architectural models that enable game designers to construct entire environments from text, speech or other reference content — for optimisation of design cost & timelines.
