

4WRDTECH

Investment Thesis

web3 themes & peripheral value-adding products

CROSS-CHAIN INTEROPERABILITY

Make it possible to transfer assets across multiple blockchains.

MIDDLEWARE LAYER

Facilitate easy implementation of portable applications by developers.

SCALABILITY SOLUTIONS

Mitigate the computing demand for key base level Layer 1s like Ethereum & Bitcoin.

SECURE STORAGE

Blockchain-linked distributed, persistent with high-security systems for off-chain data.

PRIVACY PROTECTION

Integrate off-chain computing w/ on-chain smart contracts. Safeguard private data via protocols such as ZK proofs.

DIGITAL TRANSFORMATION

Convergence of physical & digital identities & environments using spatial computing — dynamic 3D model visualisation frameworks in real-time.

AI FOR METAVERSE

3D architectural models (as extensions to Unity, U.E. etc.) to enable game designers to construct full environments from text, speech or reference content — to optimise design cost & timelines for development.
