4WRDTECH Investment Thesis

web3 themes & peripheral value-adding products

CROSS-CHAIN INTEROPERABILITY

Deploy frictionless transfer of assets across multiple blockchains.

MIDDLEWARE LAYER

Facilitate abstraction layer for the development of portable apps.

SCALABILITY SOLUTIONS

Mitigate computing demand for primary Layer 1s like Ethereum & Bitcoin.

SECURE STORAGE

Blockchain-linked distributed, persistent & high-security systems for off-chain data.

PRIVACY PROTECTION

Integration of off-chain computing with on-chain smart contracts & preservation of private data via protocols such as ZK proofs.

DIGITAL TRANSFORMATION

Convergence of physical / digital identities & environments using spatial computing — dynamic 3D model visualisation frameworks in real-time.

AI FOR METAVERSE

3D architectural models (extensions to Unity, Unreal Engine, etc.) to enable game designers to construct entire environments from text, speech or reference content — optimisation of design cost & timelines.
