4WRDTECH Investment Thesis

web3 themes & adjacent value-adding products

CROSS-CHAIN INTEROPERABILITY

Deploys frictionless transfer of assets across multiple blockchains.

MIDDLEWARE LAYER

Facilitates abstraction layer for effective development of portable applications.

SCALABILITY SOLUTIONS

Increase transaction throughput, reduce fees and improve overall customer experience.

SECURE STORAGE

Blockchain-linked distributed, persistent & high-security systems corroborating off-chain data.

PRIVACY PROTECTION

Integration of off-chain computing with on-chain smart contracts & preservation of private data via protocols such as ZK proofs.

DIGITAL TRANSFORMATION

Convergence of physical / digital identities & environments using spatial computing — dynamic 3D model visualisation frameworks in real-time.

AGI FOR METAVERSE

3D architectural models that enable game designers to construct entire environments from text, speech or other reference content — for optimisation of design cost & timelines.
