4WRDTECH
Investment Thesis

web3 themes & peripheral value-adding products

CROSS-CHAIN INTEROPERABILITY

Make it possible to transfer assets across multiple blockchains

MIDDLEWARE LAYER

Facilitate implementation of portable applications by devs

SCALABILITY SOLUTIONS

Relieve the computing demand for primary Layer 1 chains like Ethereum and Bitcoin

SECURE STORAGE

Blockchain-linked distributed, persistent solutions for off-chain data

PRIVACY PROTECTION

Integrate off-chain computing w/ on-chain smart contracts. Safeguard private data via protocols such as ZK proofs

DIGITAL TRANSFORMATION

Convergence of physical & digital identities & environments using spatial computing — offer dynamic 3D visualisation in real-time

AI FOR METAVERSE

3D architectural models (as extensions to Unity, U.E. etc.) to enable game designers to construct full environments from text, speech or reference content — to optimise design cost & timelines for development
