4WRDTECH Investment Thesis

web3 themes & adjacent value-adding products

CROSS-CHAIN INTEROPERABILITY

Deploys frictionless transfer of assets across multiple blockchains.

MIDDLEWARE LAYER / INTERFACE

Facilitates abstraction layer for effective development of portable applications.

SCALABILITY INFRASTRUCTURE

Increase transaction throughput, reduce fees and improve overall customer experience.

SECURE STORAGE SOLUTIONS

Blockchain-linked distributed, persistent & high-security systems corroborating off-chain data.

PRIVACY & SECURITY APPS

Application built for fast & efficient proof verification and support privacy-preserving transactions using protocols like ZK proofs.

DIGITAL TRANSFORMATION

Convergence of physical / digital identities & environments using spatial computing — dynamic 3D model visualisation frameworks in real-time.

AGI FOR METAVERSE

3D architectural models that enable game designers to construct entire environments from text, speech or other reference content — for optimisation of design cost & timelines.
