4WRDTECH
Investment Thesis

web3 themes & peripheral value-adding products

CROSS-CHAIN INTEROPERABILITY
Make it possible to transfer assets across multiple blockchains

MIDDLEWARE LAYER
Facilitate implementation of portable applications by devs

SCALABILITY SOLUTIONS
Relieve the computing demand for key base level Layer 1s
(Ethereum & Bitcoin)

SECURE STORAGE
Blockchain-linked distributed, persistent with high security systems for off-chain data

PRIVACY PROTECTION
Integrate off-chain computing w/ on-chain smart contracts. Safeguard private data via protocols such as ZK proofs

DIGITAL TRANSFORMATION
Convergence of physical & digital identities & environments using spatial computing — offer dynamic 3D visualisation in real-time

AI FOR METAVERSE
3D architectural models (as extensions to Unity, U.E. etc.) to enable game designers to construct full environments from text, speech or reference content — to optimise design cost & timelines for development
